PRESS RELEASE 01/2015

Berlin, 2015-03-27

More attractive, faster, better: the new BANDELIN website

With the relaunch of the company website, BANDELIN is improving the availability of information on all aspects of high-performance ultrasound technology. The highlights of the new website are the outstanding user friendliness and the attractive, contemporary design. Visitors can view the clearly organised contents quickly and systematically. A new, continuously growing database with best practice examples for a wide variety of cleaning applications offers a unique service for the optimal integration of ultrasonic cleaning in medical and industrial applications, laboratories and many other sectors. The wealth of information is complemented by an embedded YouTube channel with helpful videos on the use of BANDELIN ultrasonic devices in the specific fields.

BANDELIN electronic is specialized in the development, manufacture and sale of ultrasonic devices, the corresponding accessories and application-specific disinfection and cleaning agents. A high level of production, modern production lines and high motivated staff guarantee a high quality of products. The devices are in use in the fields of industry, in the service sector, in medicine, in the pharmaceutical industry, in the dental field and in laboratories.
